4th December 2013

Dear Karen

Thank you for introducing Spectrum Financial Planning to your services as Adminisme.

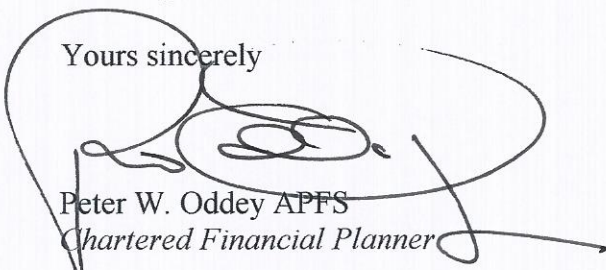

UK financial services are going through a great deal of change at present and Spectrum is by no means exempt. Regulatory issues, operational matters and changing revenue models have all served to exert downward pressure on the services Spectrum provides.

In the words of a well-known brand you do precisely 'what it says on the tin'! You have very quickly got to grips with the financial services software: inputting the precise data for investment funds, generating portfolio valuations and helping out with the report typing.

Dawn and I look forward retaining your services over the coming months and have no hesitation in recommending your skills to anyone requiring office support.

Kind regards.

Yours sincerely

Peter W. Oddey APFS
Chartered Financial Planner
